## **DETAILED ACTION**

1. Receipt is acknowledged of the amendment filed on April 3, 2006, which has been fully considered in this action.

#### Election/Restrictions

2. Newly submitted claims 13-20 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The product as claimed can be made by another and materially different process other than injection molding

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 13-20 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 3, 6, 7, 9, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Heimann et al.

Application/Control Number: 10/748,620

Art Unit: 3752

Heimann et al shows a water dispensing head comprising an outer plastic body 11/12 and a plastic preformed channel 3 and direct interlocking connection at 13, see Figure 1 and 13.

Note that the cross-sectional hatching of the plastic body 11/12 and preformed channel 11 are the same, which clearly indicates that the preformed channel is also plastic. Claim 1 is considered a product by process claim, therefore, the recitations of the process of making (i.e. injection molded) are not given any patentable weight, since the apparatus of Heimann et al meets the structural limitations as claimed.

#### Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 2 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heimann et al.

Heimann et al discloses all the featured elements of the instant invention except the type of plastic and the chemical bond. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide one of the plastics as claimed for the outer body and channel as a matter of obvious design since anyone of these plastics would perform equally as well in the hand shower of Heimann et al. It would have been obvious to one of ordinary skill in the art to use a chemical bond for the interlocking connection wherein so doing would amount to the mere substitution of one connection means for another within the same art

Page 3

Art Unit: 3752

and the selection of any of these interlocking connections means would work equally well in the Heimann et al device.

# Allowable Subject Matter

7. Claims 4, 5 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

8. Applicant's arguments filed April 3, 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments that Heimann et al does not teach or suggest the outer body that is injection molded about the preformed molded channel or the channel being an injection molded plastic preformed channel, note that claim 1 is considered a product by process claim the injection molded process language is not given any patentable weight, also the patentability of a product/apparatus is not dependent on its method of production. In addition, Heimann et al teaches that coupling elements 2 are injection molded and therefore, such a process is known by Heimann et al and could be used for the production of the outer body and preformed molded channel.

#### Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/748,620

Art Unit: 3752

Page 5

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is 571-272-4899. The examiner can normally be reached on 7:00-5:00; M,Tu, W and Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 571-272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/748,620
